Questionnaire Questions & Answers

Threshold
Local Waterfront Revitalization Program
Local Waterfront Revitalization Program Grant: Applicant Eligibility
Q_1129 Are you a village, town, or city, located along the State's coast or a designated inland
waterway, or a county with the consent and on behalf of one of more village, town, or city,
located along the State's coast or a designated inland waterway?
Yes

Q_3775 Are you able to provide the required match of at least 50% of total eligible cost for the project?
Yes

Location
Q_184 NYS Assembly District(s) where the project is located. (please enter a number between 1 and
150 that represents your Assembly District)
148

Q_190 NY Senate District(s) where the project is located. (please enter a number between 1 and 63
that represents your Senate District)
57

Q_565 Project City
Portville-Olean-Allegany-Salamanca

Q 568

**Q_3656**
Is the project included in a NY Rising Community Reconstruction Program plan or a NY Rising Countywide Resiliency Plan?

No

**Q_3744**
If the project is included in a NY Rising Community Reconstruction Program plan or a NY Rising Countywide Resiliency Plan, please indicate the planning committee name, project name, and location.

No Answer
Q_3762 Does your project directly address the needs of people in your region who are living in poverty and who seek resources for inclusion in the economic life of New York State?

Yes

Q_3763 How does your project seek to apply CFA funds for the purpose of eliminating barriers to skilled employment by poor people in your region, as identified by the Opportunity Agenda? Please describe any efforts to collaborate at the local or regional level (i.e. public, private, labor, philanthropic sectors).

No Answer

Q_3764 How does your project build workforce development programs, improve physical infrastructure, and/or establish social services that connect people living in poverty in your region with skilled employment, in correspondence with the economic revitalization priorities, distressed community targets, and the industry growth areas identified in the Opportunity Agenda and Strategic Plan?

No Answer

Q_3766 Is this a Global NY Project?

No

Q_3768 If this is a Global NY Project, please describe how this project relates to the identified goals of your region's Global Marketing and Export Strategies as part of the Global NY initiative?

No Answer

Project Description

Q_575 Project Description. Concisely describe the project, indicating the location, what will be planned, designed, acquired, and/or constructed, the issues/opportunities to be addressed, and expected outcomes and deliverables. Additional details will be collected later in the application process.

Although some limited trail systems have been established along the Allegheny River corridor, residents of Olean, Salamanca, Allegany, Olean and Portville still use the system of flood-control levees for linear recreation purposes. A comprehensive trail system, while envisioned in these communities' comprehensive plans, has not yet been established. This Plan will evaluate options for developing a multi-use recreation trail system, exploring strategies to improve waterfront access, promote this underutilized river corridor and identify and attract recreation-based businesses to strengthen the regional tourism economy. The Plan will include analysis of potential sources for funding, environmental impacts, existing infrastructure, trail types and alternatives, functional linkages within the study area, estimate costs, phasing of implementation, maintenance and management options.
Q_930 Explain what makes your project a regional economic priority - for example creates jobs, economic investment, sustainability and community revitalization, government efficiency or consolidation etc.

The direct benefits of a well-thought out Plan are to provide recreational and transportation opportunities. In addition, the communities will benefit from open space preservation, and adjoining property owners can also benefit.

This strategic Plan will provide a conceptual framework and a long range vision that will identify opportunities in the defined study area based on an identification and evaluation of several potential trail corridors, viable and functional linkages that will provide new recreation opportunities, particularly in unique waterfront locations along the Allegheny River and Olean Creek.

Q_929 Current State of Project Development (i.e. planning, preliminary engineering, final design, etc. You may enter N/A for non-project related applications)

Planning

Q_975 Estimated Project Timeline: including project start/completion dates, estimates for design, permitting and construction or other major steps. (You may enter N/A for non-Project related applications)

Community Outreach: 12/1/2014
Establishment of Steering Committee: 12/1/2014 - 1/3/2015
Scope of Services Defined: 1/15 - 2/15/2015
Request for Proposals Advertisement: 3/1/2015; due 3/21/2015
Selection of Consultant: 4/20/2015
Contract Execution: 5/15/2015
Project Start-Up: 5/21/2015
Draft Plan Completed: 3/01/2016
Final Plan Adoption: 4/01/2016

Q_976 Statement of Need

Mirroring the national trend of increasing popularity of hiking, bicycling, canoeing, kayaking, etc. as both a recreational activity and as a mode of transportation, this trend is evident locally along the river corridor where increasing numbers of recreational enthusiasts are seen. Olean was awarded NYSDOT TEP funding to construct .25 mile of paved asphalt pedestrian trail crossing Olean Creek and is seeking funding from OPRHP and ESD for Bradner Stadium improvements and the Forness Trail project located in the river corridor. Portville is interested in enhancing its boat launches for handicap accessibility. Salamanca's Plan include a riverfront park, boat launch, and a bike/xcountry ski trail. The challenge for these communities is to continue these efforts, in a collaborative fashion, to respond to this demand and provide a safe and pleasant linear park trail system.

Q_580 Provide a list of all federal, state, and local reviews, approvals, or permits needed or completed, including the dates when they are expected to be completed or were completed. If Not Applicable, indicate "NA".
The completed LWR Plan and its strategies and recommendations will be delivered to each of the participating communities’ local planning boards and village, town, city boards for formal adoption.

Q_2364 What is the status of State and/or Federal Environmental Review? If review of the project is underway or completed pursuant to the State Environmental Quality Review Act (SEQRA) or National Environmental Policy Act (NEPA), please indicate the lead agency (if applicable).

SEQRA and NEPA review process underway.

Q_1054 If National Environmental Policy Act (NEPA) Record of Decision has been issued, please explain (include date of Record of Decision).

No Answer

Prior CFA Funding

Q_2362 If funding was awarded in prior CFA rounds, what were the CFA numbers for which funding was awarded? (separate multiple CFA numbers with commas)

6816; 2051; and X649

**Standard Question**

Local Waterfront Revitalization Program

Local Waterfront Revitalization: Project Location, Eligible Waterbody or Waterway

Q_1580 Indicate the name of Waterbody(ies) and/or Waterway(s) that make(s) the applicant-municipality eligible for Environmental Protection Fund Local Waterfront Revitalization Program grant funding for the proposed project.

Allegheny River

Q_1421 In addition to the brief project description provided above, please break down the eligible project components and work proposed for each grant for which you are requesting funding. If the grant proposal is part of a larger project, describe the complete project and identify the portion proposed for current grant funding.

Component 1: Project Start-up. City will host a scoping meeting with steering committee consisting of participating communities and project stakeholders. Scope of work will be developed and review to ensure parties are clear on work plan, approach and associated deliverables.

Component 2: Community Participation and Techniques to Enlist Partners.

Local Waterfront Revitalization: Project Work Program

Q_1124 Outline a proposed work program that will guide the planning, design, and/or construction of
the project indicated in the project description. The work program should include a scope of work, the location and geographic extent, project components (e.g., planning, design construction) and should be connected to issues or opportunities to be addressed, the goals and objectives to be achieved, and the outcomes and deliverables anticipated. The work program should include a project schedule of completion within three years. Refer to the Estimated Project Time Line provided in response to question Q_975, but, in addition to estimates for the start and completion dates, estimates for design, permitting and construction (as applicable) also provide target dates for individual major tasks/milestones and deliverables.

Component 1: Project Start-up. The City will host an initial meeting with key project participants to discuss SEQRA requirements, the consultant procurement process and how the budget should be directed. Composition of a project advisory committee and public participation techniques will also be discussed. The City, with consultation of participating communities, shall then establish a steering committee to oversee the process. City shall develop, with steering committee input, a RFP to select a consultant based on submission of a project proposal. Consultants will be interviewed by the City and steering committee with recommendation of consultant selection to City Council. Council will award contract. After contract preparation and execution, the project scoping session will occur with the City, consultant, key project participants, and DOS. Project Outline will be presented to DOS.

Component 2: Public Outreach/Community Participation. City and contractor will meet with steering committee to develop public outreach plan as continuous community engagement is critical in this planning process. Component 3: City and steering committee will develop a comprehensive waterfront revitalization plan through community visioning process to identify regional and local assets and develop strategies to: address land use and development issues; enhance and expand public access to waterfront areas where appropriate; preserve open space and natural resources; identify new tourism infrastructure and recreation projects that will promote the river corridor. Component 4: Completion and Distribution of Draft Plan.

Component : NYS SEQR. Component 7: Project Reporting.

Q_3765 For projects which include construction, will all proposed work be performed on public property or where there is a permanent public interest established, such as a conservation easement and is the predominant purpose of the construction to provide a public benefit?

CFA funding request is for planning.

Q_1434 Describe the administrative structures in place to administer the requested grant. Identify individuals who will be responsible for specific tasks, such as contract and grants administration, fiscal accounting, and project management. For those managers and professionals already hired, describe their qualifications. Summarize consultant selection process and schedule, noting whether it is completed, underway or proposed. For future hires, describe qualifications sought and procurement/hiring method.

The City of Olean Department of Community Development and the Department of Public Works will administer the grant program. Mary George, Community Development Program Coordinator, has 30 years' experience in grants administration including State compliance requirements and fiscal accounting. Thomas Windus, Director of Public Works, has 20 years' experience in contract administration and project management.

Q_1450 Will the proposed project result in the creation of construction jobs? If so, estimate the number of construction jobs to be created.
Enter zero if not applicable.

0

Q_1459 Will the proposed project directly or indirectly result in the creation of permanent jobs? If so, estimate the number of permanent full-time equivalent jobs that will be created.

Enter zero if not applicable.

0

Geographic Coverage

Q_57 List all the municipalities (County, City, Town and Village) covered by the project.

- City of Olean, Salamanca;
- Towns of Portville, Olean, Salamanca;
- Villages of Portville, and Allegany.

Q_1385 Describe the public benefit that will result from completion of the project. Show why the State should participate in the cost of the project. What is the economic benefit of this project to the citizens and visitors of New York State?

This strategic Plan, once completed, will provide the residents of the participating communities located along the Allegheny River and its tributaries with a summary idea of which lands located within the river valley might best be used for recreation-open space purposes. A long range cohesive vision will be developed that will identify opportunities for waterfront revitalization, and suggest strategies that will provide new recreation opportunities along the River corridor as well as policies to protect and preserve open space areas thus improving community quality of life.

Health Benefit: The Prevention Agenda 2013-17 is New York State's health improvement plan for 2013 through 2017, developed in partnership with more than 140 organizations across the State. One of the Prevention Agenda's five priority areas defined in its vision is to "promote healthy and safe environments." According to the Plan, the key to its success will be "the active engagement of local communities." In conjunction with the State's Plan, Cattaraugus County, with Community Transformation Grant Funding for Small Communities, established the Commnity Health Assessment and Community Health Improvement Plan for 2014-2017. As a member community of that cohort, Olean is working with other communities, schools, and organizations to create community environments that promote healthy and safe environments for our residents.

Economic Benefit: People will return to the area to experience these recreational benefits which will spur community and economic activity and investment in our communities.

Local Waterfront Revitalization: Distressed and Underserved Communities

Q_1120 Provide a statement regarding the project's impact on areas that are densely populated and have sustained physical deterioration, decay, neglect, or disinvestment, or where a substantial proportion of the residential population is of low income or is otherwise disadvantaged and is underserved with respect to the existing recreational opportunities.

The project study area includes the neighboring communities of Portville, Olean, Allegany,
and Salamanca. St. Bonaventure University, with several acres of land along the Allegheny River, is also a participant in this Plan. Olean and Salamanca, as the two largest cities in Cattaraugus County, have poverty levels of 17.5% and 21% respectively. The Plan, when completed, will identify areas along the river corridor prime for waterfront development. While the potential for abundant recreational and open space opportunities exist for each of these communities along the Allegheny River valley corridor, financial sources do not. In developing the LWRP and imagining what the river corridor could become, several positive impacts are expected including: improved quality of life — cities and towns where people will want to live and visit for its inventory of attractions, amenities, connecting neighborhoods, and overall community appeal; a catalyst for urban renewal and economic development. The economic benefits of developing the river corridor are numerous, sustaining and creating jobs and business opportunities both directly and indirectly. Development, investment and renewal in these existing neighborhoods within or abutting the corridor will make the corridor more appealing to continue investment and renewal. Improved health and well being of residents can also be expected as more active lifestyles will be encouraged by the waterway's facilities linkages and programs.

Q_1423
If the proposed project involves a remediated brownfield, describe how it will rehabilitate or restore the site.

No Answer

Local Waterfront Revitalization: Vision

Q_3770
Explain how the project will result in or advance a vision creating significant opportunities for addressing resolution of problems in the context of a Regional Economic Development Strategy, NY Rising Community Reconstruction Plan, and/or regional or local vision for capitalizing on community assets.

The Allegheny River is the dominant recreation feature in the Allegheny River Valley representing one of a diminishing number of relatively clean and attractive rivers in Northeastern United States. The Allegheny Reservoir and Allegheny State Park are by far the most significant existing recreation areas in or near the study area. The project, with engagement from stakeholders and residents, will look to achieve a vision that will successfully balance developed and undeveloped lands to achieve maximum economy in protecting our key natural and scenic areas that are vitally important community assets.

Local Waterfront Revitalization: Strategies

Q_3771
Explain how the project will result in or advance the following, as applicable: strategies of the NY Rising Community Reconstruction Program, strategies of a Regional Economic Development Council including Opportunity Agenda strategies, strategies of Regional Significance, strategies of Local Significance, strategies related to Public Value, Community Livability, Sustainability, Economic Value, Natural Resource Value (see help).

The basis for preparing this Plan can best be described as an effort to achieve a balance between developed and undeveloped lands and to achieve maximum economy in protecting and servicing those areas within the study area which should or could eventually become developed. The participating communities, working together in a collaborative fashion, will assure that efforts to resolve shared issues will occur and strategies will be developed that address critical issues and opportunities of local and regional significance. The Plan will incorporate strategies and projects that enhance the quality and availability of our important natural asset, the Allegheny River valley corridor.
Local Waterfront Revitalization: Program Completion and/or Implementation

Q_2621
Describe how the proposed project will advance the completion of a Local or Regional Waterfront Revitalization Program, Plan or Strategy, or will implement such programs, plan or strategies.

The development of the Local Waterfront Revitalization Plan and its strategies and recommendations for implementation will advance the participating communities' goals for projects along the river corridor that are appropriate for implementation.

Project Partners

Q_40
List all the project partners involved in the project and provide contact information.

Project partners include: Portville Planning Board Chair Bob Fischer; Portville Town Board member Dave McCoy; City of Olean CD Director Mary George; Town of Olean Board member John Kwiatkowski; Town of Allegany Town Supervisor John Hare; Allegany Town Planner Carol Horowitz; Village of Allegany Mayor Rick Lambers; Sandi Brundage, City of Salamanca; County Planner Paul Bishop; County Economic Development Director Crystal Abers; Catt. County Youth Bureau Director Tony Evans; George Fillgrove, Senator Catharine Young's office; Greater Olean Area Chamber of Commerce Director Larry Sorokes; St. Bonaventure University professor Phil Winger; Directions in Independent Living Frank DeFiore; Catt. County Head Start ED Ira Katzenstein; Catt. Co BOCES Tim Emley; Gregg Piechota, City Assessor, owner of Four Mile Brewing; local residents.

Local Waterfront Revitalization: Process - Public Engagement, Local Commitment and Previous Performance.

Q_3776
Describe the approach and process that will be followed to ensure ongoing public participation and engagement during project development and implementation, the level of local commitment and support, and the quality of applicant performance under previous contracts with the Department of State.

The City of Olean and its partnering communities, educational institutions, private and public organizations, local businesses, and other community stakeholders believe that upfront and continuous community engagement is critical to establishing a sense of local ownership and support for the planning process. The steering committee will direct the planning process and will be open to the public. We will involve and connect with business and property owners within the study area because they play a critically important role in the future prosperity and success of the study area and the Plan's development. We will develop project newsletters for those community members that are unable to attend public meetings, and will develop a project website that will serve as both an information portal for interested residents and stakeholders and a means for the public to provide comments and ideas through the planning process. Local leaders and public officials, community planners, along with St. Bonaventure University officials, BOCES officials, local businesses, entrepreneurs, and community activists have been meeting informally for several months and are committed and supportive of the project and its implementation. The City of Olean completed a Step 1 BOA Plan for its Northwest Corridor and are in the process of completing a Step 2 Plan with support from NYSDOS officials.

Local Waterfront Revitalization: Leveraging Resources, Advancing Plans, and Developing Partnerships

Q 3772
Explain how the project will Leverage Resources, Advance Plans, and Develop Partnerships.

The Plan, and its corresponding work components, including continuous community
e engagement and participating communities' involvement, will build and increase existing
public/private partnerships and leverage not only financial resources, but dedicated human
resources as well. Community partners, public and private, working in a cohesive fashion, will
strengthen the existing and new intermunicipal, intergovernmental, public, and private
partnerships producing a cost efficient Plan.

Local Waterfront Revitalization: Implementation - Scope of Work, Time Frame, and Project
Readiness

Q_3773

Clearly define how the project will be implemented. Link your explanation to your project
Scope of Work, Time Frame, and Project Readiness.

The proposed Scope of Work and its associated timeline and deliverables presented are
clearly defined. The City, the steering committee and the selected consultant will be
committed to meeting the schedule outlined. However, we do recognize that fluid nature of the
planning process and that schedules often change due to factors outside our control. To
mitigate this City will be in regular contact with the consultant's project manager to ensure all
parties understand project status, anticipating variances in schedule, etc. The City of Olean
and its key project officials have 50+ combined years of experience in successful completions
of various planning projects. All municipal partners support the project and will lend their
department professionals to advance the project.

Q_1572

Describe and document how the budget and costs were determined.

Mary George, Community Development Program Coordinator, prepared the budget for this
project. Ms. George received a Bachelor's in Business and Organizational Management at
Houghton College and has 30 years of planning experience working for the City of Olean in
the CD Department. City officials consulted with local consultants and communities receiving
LWRP grants to develop a Plan to arrive at reasonable cost estimates needed to prepare the
Plan.

Q_1573

Describe and document how costs meet eligibility requirements of the program.

Local match (50%) of total project cost will be provided via $25,000 cash from the 2014
Community Development budget line item account #8660.453. The remaining $13,785 will
come from in-kind contributions from volunteers and professionals working on the Plan.

Q_1574

Describe and document how costs clearly relate to and support activities in the proposed
work plan.

The proposed scope of work and associated costs are logical and in line with standard
practices in the planning field. Mary George has lived and worked in the area for most of her
career in Community Development. Paul Bishop and other employees in the Cattaraugus
County Department of Planning, Development & Tourism will lend not only planning expertise
but also GIS skills crucial to Map development. The DPW Director, Tom Windus, will lend
valuable technical assistance to the steering committee as well. Keri Kerper, Sr. Account
Clerk Stenographer, has 10+ years in Community Development and will assist in project
administration and record keeping.

Q_1575
Describe and document how the budget includes adequate detail for all project components involved, is cost-effective, presents necessary and realistic costs, and does not contain extraneous expenses.

The following itemized budget identifies the proposed costs associated with each task defined in the Project Approach:
Component 1: Project Startup: $1,070 (Review proposed scope of work, identify lines of communication and agree on project timeline, roles and responsibilities, etc.
Component 2: Public Outreach/ Community Participation: $6,700 Component 3: Draft Plan: $67,600 (visioning phase, steering committee meetings (8) over course of planning process with oversight by consultant, review deliverables, obtain feedback; (4) public meetings at key intervals). Component 4: Distribution of draft Plan and corresponding maps: $700 (via interactive website managed by consultant on behalf of City, project newsletters (4) strategically timed through the planning process). Component 5: SEQR: $900. All work will be completed in accordance with the SEQRA process and in coordination with the City of Olean. Component 6: Project Reporting: $600. All required reports will be submitted to NYSDOS.

Local Waterfront Revitalization: Performance Measures

Q_3774
Explain how project performance will be measured including how the project will be monitored and progress recorded to achieve milestones and complete individual products and deliverables according to the project schedule and timeline and what logical metrics will be used to quantify anticipated benefits of the project.

Project will be monitored and progress recorded to achieve milestones through regular communications and coordination with the City as project sponsor, the consultant selected, and also through the steering committee working on the project.

Smart Growth

Smart Growth Questions:The NYS Smart Growth Public Infrastructure Policy Act requires that a project meet the relevant smart growth criterion to the extent practicable. Please respond to the questions below regarding smart growth criteria.

Q_1059
Does the proposed project use, maintain, or improve existing infrastructure? Y/N/Not Relevant. Please explain all responses.

Yes. Consistent with Smart Growth principles and objectives identified in the WNYREDC's "A Strategy for Prosperity", projects identified in the Plan will be prioritized and investment will be focused on existing community assets where infrastructure already exists. The project will also preserve open space and promote livability by improving community quality of life and public health.

Q_1060
Is the proposed project located in a municipal center? Y/N/Not Relevant. Please explain all responses.

Yes. The project's study area is approximately 76 acres of land along the Allegheny River. Several cities, towns and villages are located within this area. Each of these municipalities are considered concentrated municipal centers that serve as centers for civic, commercial, recreational and residential activities.
Q_1061 Is the proposed project located in a developed area or an area designated for concentrated infill development in a municipally approved comprehensive land use plan, local waterfront revitalization plan and/or brownfield opportunity area plan? Y/N/Not Relevant. Please explain all responses.

Yes. The objective of the Plan and its development will be to ensure that new development, if proposed is appropriate and aligns with the corresponding municipal and local town/village approved comprehensive land use plans.

Q_1062 Will the proposed project protect, preserve and enhance the State's resources, including agricultural land, forests, surface and groundwater, air quality, recreation and open space, scenic areas, and significant historic and archeological resources? Y/N/Not Relevant. Please explain all responses.

Yes. The project is a Comprehensive Plan that will recommend strategies for both development opportunities (recreation and open space) and preservation of our natural resources.

Q_1063 Will the proposed project foster mixed land uses and compact development, downtown revitalization, Brownfield redevelopment, the enhancement of beauty in public spaces, the diversity and affordability of housing in proximity to places of employment, recreation and commercial development and the integration of all income and age groups? Y/N/Not Relevant. Please explain all responses.

Yes. The project will result in a Plan that will identify projects (recreation and open space) that will enhance and protect the natural beauty of the Allegheny River Valley corridor for all income and age groups in the communities to be served.

Q_1064 Will the proposed project provide mobility through transportation choices including improved public transportation and reduced automobile dependency? Y/N/Not Relevant. Please explain all responses.

Yes. The projects that come forth from the Plan complement alternatives to automobile travel. Trails will be proposed and designed for nature walks, hiking and bicycling, and incorporated into general trails linking major recreation areas, as well as minor trails within designated open spaces. Existing boat launch areas (and new ones) will support canoeing and boating in the Allegheny River.

Q_1065 Will the proposed project involve coordination between state and local government and inter-municipal and regional planning? Y/N/Not Relevant. Please explain all responses.

Yes. Continued interaction and communication throughout the planning process will occur between the City of Olean and all participating entities (including village, town and city governments), county and local planning boards, and the Southern Tier West Regional Planning & Development Board. City officials have been and will continue to reach out and engage these and other organizations.

Q_1066 Will the proposed project involve participation in community based planning and collaboration? Y/N/Not Relevant. Please explain all responses.
Yes. A local group of community activists, organizations, residents, and municipal leaders have been meeting on an informal basis for several months in anticipation of this planning process. The group is diverse (local bicycle enthusiasts, members of the Allegheny River Valley Trail, SBU representatives, members of the City of Salamanca Recreation and Riverfront Comprehensive Plan, State Senate and Assembly representatives for the area, the local and County Youth Bureau and their resident members, including youth and elderly, the Portville covered bridge folks, local business leaders, etc.) Through our community participation and techniques to enlist partners component we will reach out to others for support in the planning process.

Q_1067
Will the proposed project ensure predictability in building and land use codes? Y/N/Not Relevant. Please explain all responses.
Yes, while the project is a planning process, the projects coming forth from the Plan will adhere to all building and land use codes, State and local.

Q_1068
Will the proposed project promote sustainability by strengthening existing and creating new communities which reduce greenhouse gas emissions and do not compromise the needs of future generations, by among other means encouraging broad based public involvement in developing and implementing a community plan and ensuring the governance structure is adequate to sustain its implementation? Y/N/Not Relevant. Please explain all responses.
Yes. The project, the Plan, is about sustainability. The project aligns with Land Use and Livable Communities Sustainability Goals listed in the Western New York 2013 Sustainability Plan: to preserve, protect and enhance public and open space areas; connect regional greenway and waterfront planning to natural resources and recreation and to encourage and support municipalities to develop and implement smart growth policies. Listed in the Western New York 2013 Sustainability Plan. Through a collaborated effort among residents of the communities along the Allegheny River Valley corridor, we will develop a Local Waterfront Revitalization Plan that will include strategies and recommendations to implement Smart Growth policies for this important river corridor. We will identify which lands might best be used for recreation to promote economic development associated with tourism and lands that should be preserved and protected as open space.

Certification

General Certifications

Q_1037
By entering your name in the box below, you certify and agree that you are authorized on behalf of the applicant and its governing body to commit the applicant to comply with the requirements of Article 15-A of the New York State Executive Law: Participation By Minority Group Members and Women With Respect To State Contracts by providing opportunities for Minority-owned Business Enterprise (MBE)/Woman-owned Business Enterprise (WBE) participation. You further certify that the applicant will maintain such records and take such actions necessary to demonstrate such compliance throughout the completion of the project.

Mary George

Q_1038
By entering your name in the box below, you certify that you are authorized on behalf of the applicant and its governing body to submit this application. You further certify that all of the information contained in this Application and in all statements, data and supporting documents which have been made or furnished for the purpose of receiving Assistance for the project described in this
application, are true, correct and complete to the best of your knowledge and belief. You acknowledge that offering a written instrument knowing that the written instrument contains a false statement or false information, with the intent to defraud the State or any political subdivision, public authority or public benefit corporation of the State, with the knowledge or belief that it will be filed with or recorded by the State or any political subdivision, public authority or public benefit corporation of the State, constitutes a crime under New York State Law.

Mary George

Local Waterfront Revitalization Program Reasonableness of Budget and Cost Certification

O_1579

By entering your name in the box below you are submitting an application under the Environmental Protection Fund Local Waterfront Revitalization Program, and hereby certify that all components of the requested Total Project Cost are reasonable and necessary for the conduct of the proposed project and that prudent analysis has been undertaken, as outlined below, to insure that all costs are consistent with current prevailing costs for such goods and services in the geographic area that will benefit from the project.

Mary George

Mr. Timothy Emley, Town Supervisor
Town of Portville
1102 Portville-Olean Road
P.O. Box 630
Portville, New York 14770

Dear Mr. Emley:

I am writing to let you know of an initiative that just passed in the New York State Legislature, which designates the Allegheny River and Cattaraugus Creek as Inland Waterways in New York state for purposes of waterfront revitalization. You are receiving this letter because you are located along the Allegheny River and are now eligible to participate in this program.

This legislation adds two waterways, the Allegheny River and Cattaraugus Creek, to the list of the state’s major lakes, rivers, and creeks. Now, because of this new law, communities like yours can either separately or jointly apply for technical assistance and grants under the state’s local Waterfront Revitalization Program.

This Local Waterfront Revitalization Program is an economic development and resource management program that was initially authorized by state law in 1981 as part of the “Waterfront Revitalization of Coastal Area and Inland Waterways Act.” The program is administered by the New York Department of State to “offer the fullest possible support by the state and its agencies to those local governments that desire to revitalize their waterfronts.”

The law authorizes state agencies to give technical and financial assistance to municipalities located along inland and coastal waterways that desire to do such waterfront revitalization. The technical assistance may include help for local governments in drafting their formal local waterfront revitalization plans or helping municipalities work smoothly with the numerous state and federal agencies that may have cross-jurisdiction over components of their proposed plan (i.e. the Urban Development Corporation, the Job Development Authority, the Environmental Facilities Corporation, the Office of Parks, Recreation and Historic Preservation and the Departments of Economic Development and Transportation) in order to get it approved.
Financial assistance by the state may be given to municipalities under this program in the form of grants that can be used for "local government research, design studies and other activities which serve to facilitate construction projects provided for in an approved waterfront revitalization program."

Attached is a more detailed description of the Local Waterfront Revitalization Program for your records.

Please accept my best wishes and do not hesitate to contact me if I can be of further assistance.

Sincerely,

[Signature]

CONSOLIDATED FUNDING APPLICATION

NYS Consolidated Funding Application Registration

Thank you for registering.

Instructions

Important - Before proceeding read the following carefully:

1. Save your information

Please make note of the following information. You should print this page and save it for your records now.

 Organization Name: City of Olean
 Project Name: Allegheny River Linear Park Trail Extension
 Your login token: adirondackpark31085edible

PLEASE DO NOT LOSE THE TOKEN SHOWN ABOVE - YOU WILL NEED IT TO ACCESS YOUR APPLICATION ONCE YOUR ACCOUNT HAS BEEN ACTIVATED.

2. Check your email

An email has been sent to you with information on how to get started with your application. You must follow the link contained in this email message to activate your account and to begin the application process.

You may need to check your SPAM folder for the activation email message.
PROPOSED LEGISLATION

ITEM # ____________

MEMO TO: Common Council President

FROM: Mayor Aiello

PROPOSED LEGISLATION

That the Mayor is authorized to submit a CFA application to the New York State Department of State under the Local Waterfront Revitalization Program for the Allegheny River Linear Park Trail Extension Project.

Recommended Committee for Discussion: Committee of the Whole

Requested Date for Council Vote: 06/10/14

Research / Study Information Attached: YES or NO

Signature: [Signature]

Date: 6/4/14

PLEASE SATISFY IF APPLICABLE

IF PL INVOLVES A TRAFFIC ORDINANCE
(E.G. NO PARKING SIGNS ETC.) OR PLACEMENT
OR REMOVAL OF A STOP SIGN, PL WILL NOT
BE ACCEPTED UNLESS ACCOMPANIED BY
WRITTEN INPUT FROM BOTH POLICE CHIEF AND
DIRECTOR OF PUBLIC WORKS.

If applicable
